Description:

In Sensing the Future, well-known paranormal experts and authors Trish and Rob MacGregor unravel the mystery around precognition to help readers develop their psychic abilities. Precognition is one of the least understood but most commonly occurring psychic experiences. At one time or another, most people have had minor experiences with synchronicity or having a feeling about a future event that came true, but few understand how it happened or how to do it again. With Sensing the Future, readers learn to enhance this innate power to benefit their lives. Trish and Rob provide tips and simple ways to coax answers to your life questions out of your dreams, and how to increase awareness of the inner realm in everyday life. They also explain the most common methods for future prediction - astrology, the tarot, numerology and stichomancy. Along the way, Trish and Rob give hundreds of examples from history when people predicted the future, from scientists to novelists and spiritual leaders, as well as personal accounts from their own experiences and those of friends and family. An important question many wonder after a precognitive event is whether our lives are truly governed by free will or destiny. If you saw the future and reacted, did you change the future through your own free will? Or was it destiny? If you're one of the curious seeking an answer, find out for yourself in Sensing the Future.
