Selling Points:

Take the plunge with sharks in this volume of Science Comics, an action-packed nonfiction graphic novel series for middle-grade readers!

Description:

Every volume of Science Comics is a complete introduction to a particular topic - dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! This volume: In Sharks, we explore one of the most unfairly villainised and Hollywood-famous underwater predators. With their 400-million year history, their vital role in maintaining the ecosystem, their incredible specialised adaptations, and their various unique species, there is a lot more to sharks than just their ferocious jaws.
